ANNUAL RETURNS

(TRIENNIAL REPORT)

OF THE

CIVIL HOSPITALS AND DISPENSARIES

IN THE

MADRAS PRESIDENCY

FOR THE YEAR

1901.

MADRAS:

PRINTED BY THE SUPERINTENDENT, GOVERNMENT PRESS.

1902.

OFFICE OF SURGEON-GENERAL
WITH THE GOVERNMENT OF MADRAS,
OOTACAMUND, 27th June 1902.

No. T 1/113.

From

SURGEON-GENERAL D. SINCLAIR, M.B., C.S.I., I.M.S.,
Surgeon-General with the Government of Madras,

To

THE CHIEF SECRETARY TO GOVERNMENT,
PUBLIC DEPARTMENT.

SIR,

I have the honour to submit herewith a report with illustrative statistics on the working of the civil medical institutions in this Presidency for the triennial period ending the 31st December 1901. In accordance with the instructions contained in G.O., No. 558, Public, dated 3rd June 1901, the report on the Presidency-Town medical institutions, etc., have been incorporated.

2. *Public Health*.—The state of public health in districts and in the City of Madras may be inferred from the following figures in which the registered deaths for the past triennium are contrasted:—

Chief diseases from which deaths occurred among free population.	1899.		1900.		1901.	
	Districts.	City.	Districts.	City.	Districts.	City.
(1) Cholera	29,052	23	60,662	632	81,370	1,242
(2) Small-pox	16,991	34	27,692	46	26,202	292
(3) Fevers	245,549	3,317	298,521	5,898	294,854	9,151
(4) Dysentery and diarrhoea	31,307	3,520	38,858	3,408	42,084	4,870
(5) All other causes ...	352,165	10,354	355,126	10,953	351,630	12,476
Total	675,094	17,248	770,859	20,937	796,140	28,031
Ratio per mille of population	19.66	38.12	22.45	46.27	20.84	55.03

From the above it will be seen that the total registered deaths in both districts and city have markedly risen during 1900 and 1901 and that the death-rate in the city far exceeds that in districts, especially in 1901. The decline in the district death-rate for 1901 is due to the calculation being made on the larger population returned by the last census. Diseases classed under "all other causes" are invariably far and away most prolific of death both in districts and city, fevers almost invariably come next, whilst bowel-complaints and cholera *longo intervallo* usually take the third or fourth place. During the last two years the deaths from cholera have increased to a serious extent both in districts and city, and in some measure the same is true of fevers, the mortality from which in the city, particularly during 1901, seems extraordinary. Through the declining dread of plague regulations, people are less afraid to register deaths as due to fever; hence no doubt the larger returns under fevers. How far the differences in the death-rates between districts and city are due to faulty registration is not for me to say.

3. *Plague*.—The total deaths from plague in the Presidency during the triennium were 1,843 in 1899, 665 in 1900 and 3,035 in 1901.

4. *Inspection of Vessels*.—During the past year 433 vessels carrying crews numbering 36,527 persons and 34,312 passengers were inspected in the City of Madras, and in addition 188 steamers arriving from plague-infected ports carrying crews of 16,396 persons and 4,589 passengers were examined.

5. *Number and Class of Institutions*.—On the 1st January 1899 there were 556 institutions of all classes at work; in the year 1900 the number rose to 582. This increase was due to the inclusion in the latter year of statistics of medical institutions belonging to various Railway Companies and private unaided bodies in accordance with the wishes of the Government of India embodied in G.O., No. 512, Public, dated 31st May 1900. At the close of the year under report there were 579 at work, *i.e.*, three less than in the preceding year due to the abolition of four Police hospitals (Vizianagram, Balliguda, Parlákimedi and Ramagiri-Udayagiri) and one private medical institution at Kallikota in the Ganjám district for want of a medical subordinate, and to the inclusion for the first time of two Railway medical institutions (Palasa and Donakonda).

These institutions were classified as follows:—

Class I.—State—

	NO.
(a) Civil	* 26
(b) Police	45
„ II.—Local and Municipal	430
„ III-A.—Private unaided included in statement II-A	55
„ III-B.—Private aided	23
Total	579

6. *Adequacy of Dispensary provision with reference to population*.—According to statement I the ratio of hospitals and dispensaries inclusive of Civil medical institutions in the City of Madras to every 1,000 of the population (census of 1891) for 1899 and 1900 was .015 and .014, respectively, and for 1901 calculated on the recent census figure .013. The difference between the ratios for the two previous years was due to the inclusion in the general statements of Police hospitals in 1899 and to their exclusion therefrom in the subsequent years. The decrease in the year under review is accounted for by the rise in population by 3,421,648. If the medical institutions included in statement II-A be added to those in the general statements, the ratio of the dispensary provision per mille of population would be .016, .017 and .015 for the years included in the triennial period. The marked increase in the year 1900 was due to the rise in the Railway medical institutions from 10 to 33.

7. *Accommodation*.—Last year 4,617 beds were available in the civil medical institutions and 691 in the institutions included in statement II-A, making a total of 5,308 (3,156 for males and 2,152 for females) as compared with 5,265 (3,188 for males and 2,077 for females) and 5,288 (3,153 for males and 2,135 for females) in 1899 and 1900, respectively. The increase of 43 beds during the triennium is due to more accommodation having been provided in the districts. The proportion of beds for males in the period fell from 60.55 in 1899 to 59.63 and 59.46 per cent., respectively, in 1900 and 1901, the proportion for females being 39.45, 40.37 and 40.54 respectively; so that with a slight decline in the accommodation for males there has been a corresponding increase for females.

8. *Total treated*.—A total of 4,751,692 were treated in civil hospitals and dispensaries in the year 1901 and 261,277 in the institutions included in statement II-A, making a grand total of 5,012,969 (2,575,806 males, 1,143,244 females and

* No statistics were furnished up to date from Government Dispensary at Amin-Devi (Laccadives) for want of communication with the mainland.

1,293,919 children). Of these in-patients numbered 48,984 males, 23,101 females and 3,402 children, or in all 75,487, and out-patients 2,526,822 males, 1,120,143 females and 1,290,517 children or 4,937,482. In the years 1899 and 1900 the total of both in- and out-patients amounted to 4,438,237 (2,228,378 males, 966,081 females and 1,243,778 children), and 4,922,614 (2,465,529 males, 1,078,260 females and 1,378,825 children), respectively. Of these, 63,184 and 73,409 were in-patients and 4,375,053 and 4,849,205 out-patients. There has thus been a continuous rise from year to year in the number, both of in-door and out-door sick. The unusual increase in 1900 was due as already explained to the inclusion in that year of Railway medical institutions. Both sexes contributed to the increase, but there was a falling off in the attendance of children last year as in the year before (1900) an epidemic of eye diseases prevailed chiefly among this class.

9. *Average daily attendance.*—The average daily attendance of in- and out-patients during the year was 31,236·58 as compared with 30,074·61 and 30,929·54 in 1899 and 1900, respectively.

10. *Classes.*—Of the total treated the proportion of Europeans and Eurasians was 2·08 per cent. in 1899, 1·85 in 1900 and 1·7 in 1901; of Hindus 72·58, 72·3 and 72·05, respectively; whereas of Mussalmans it fluctuated between 11·85 and 12·07, whilst among all other classes it ranged from 13·49 to 13·93. These variations are trifling and need no explanation.

11. *Attendance by proxies.*—There was a gradual diminution of attendance by proxies; such attendance declined from 8·88 in 1899 to 7·67 and 7·08 per cent. of total treated in 1900 and 1901, respectively.

12. *Results of treatment among in-patients.*—There was a percentage of 58·25 cured during 1901 as compared with 61·41 and 57·91 in 1899 and 1900, respectively; among those relieved and discharged otherwise, the proportion fluctuated from 28·92 in 1899 to 30·58 in 1900 and 28·82 in 1901. The ratio of deaths was 5·73, 7·69 and 9·18 in 1899, 1900 and 1901, respectively. Excluding the number admitted moribund, viz., 728, 910 and 975, the ratio of deaths would be 4·62, 5·49 and 7·67, respectively. The successive increase was due to a large number admitted for cholera in the last two years. Out of the total number admitted moribund 109, 116 and 104 were removed moribund or 14·97, 12·75 and 10·67 per cent. It is gratifying to note that only 6 septic cases occurred in hospitals during 1901 against 14 and 15 in 1899 and 1900. Of these, 3 took place in the General Hospital, 2 in the Government Maternity Hospital and 1 in Coimbatore. The steps taken to prevent its spread were satisfactory. One hundred and twenty-four, 115 and 117 were admitted septic during the triennial period.

13. *Diseases treated.*—The diseases among in- and out-patients are classified and compared below :—

	1899.		1900.		1901.	
	No.	Ratio per cent.	No.	Ratio per cent.	No.	Ratio per cent.
(1) General diseases	1,354,751	30·52	1,138,735	29·23	1,500,507	29·93
(2) Local diseases	2,848,276	64·18	3,221,458	65·44	3,245,963	64·75
(3) Injuries	225,265	5·07	252,472	5·13	254,592	5·08
(4) Poisons	8,306	0·19	8,396	·17	9,719	·20
(5) No appreciable disease	1,639	0·04	1,553	·03	2,188	·04
Total	4,438,237		4,922,614		5,012,969	

The most important type of disease under the first two heads were —

General Diseases.

	1899.		1900.		1901.	
	No.	Ratio per cent.	No.	Ratio per cent.	No.	Ratio per cent.
(1) Malarial fevers	437,627	9·86	460,955	9·36	508,184	10·14
(2) Worms	283,015	6·38	275,029	5·59	275,309	5·49
(3) Rheumatic affections	206,585	4·65	214,543	4·35	214,184	4·26
(4) Dysentery	71,936	1·62	75,916	1·05	85,916	1·71
(5) Syphilis and gonorrhoea	81,191	1·83	87,712	1·78	91,835	1·83
(6) Cholera	3,262	·07	10,336	·2	10,833	·27
(7) Debility and anaemia	31,377	·77	32,479	·66	34,117	·68

Local Diseases.

	1899.		1900.		1901.	
	No.	Ratio per cent.	No.	Ratio per cent.	No.	Ratio per cent.
Ulcers and diseases of the skin	943,660	21.26	1,039,926	21.13	1,048,839	20.92
Diseases of the digestive system	700,556	15.78	741,429	15.06	768,487	15.33
Of which diarrhoea contributed	32,187	.72	35,419	.71	39,423	.79
Diseases of the eye	340,231	7.66	497,336	10.1	437,170	8.07
Disease of the ear	245,435	5.53	278,108	5.6	293,936	5.86
Disease of the respiratory system	196,001	4.42	201,188	4.09	217,415	4.34

14. *Operations.*—During 1901, 151,695 operations were performed on 149,858 persons as compared with 137,504 on 135,928 in 1899 and 154,200 on 152,600 in 1900. The decrease during 1901 is only nominal and is due to the removal from the list, 6,703 operations on the ear—Removal of wax and foreign bodies from the external meatus. The results during the triennium are compared below :—

	Number of persons operated on including those remaining at the beginning of the year.	Cured		Relieved and discharged.		Died.	
		No.	Ratio per cent.	No.	Ratio per cent.	No.	Ratio per cent.
1899	136,527	127,774	93.59	7,692	5.63	287	0.21
1900	153,489	145,058	94.51	7,320	4.77	273	0.18
1901	150,695	142,461	94.54	7,029	4.66	295	0.2

If operations for the removal of wax and foreign bodies from the external meatus were excluded from the two previous years' returns, the results would stand thus—

	Number of persons operated on including those remaining at the beginning of the year.	Cured.		Relieved and discharged.		Died.	
		No.	Ratio per cent.	No.	Ratio per cent.	No.	Ratio per cent.
1899	130,400	121,714	93.34	7,625	5.85	287	0.22
1900	147,801	139,435	94.34	7,256	4.91	273	0.18
1901	150,695	142,461	94.54	7,029	4.66	295	0.2

There was also a general increase in the important operations performed among in-patients which are summarised below :—

Names of important operations.				Number performed.	Number died.
(1) Excision of tumours	1899	2,167	7
	1900	2,051	5
	1901	2,273	8
(2) Excision of joints	1899	8	1
	1900	12	...
	1901	13	...
(3) Amputations	1899	515	19
	1900	551	20
	1901	605	16
(4) Iridectomy	1899	248	...
	1900	212	...
	1901	192	...
(5) Abdominal section	1899	50	17
	1900	56	20
	1901	75	25
(6) Operations for hernia.	1899	316	21
	1900	335	17
	1901	326	15
(7) Operations on kidneys.	1899	3	...
	1900	2	1
	1901	4	1
(8) Removal of vesical calculi.	1899	43	6
	1900	44	1
	1901	20	1
(9) Obstetric operations	1899	1,694	112
	1900	1,763	87
	1901	1,801	112

15. *Dentistry*.—The work of the Dental Surgeon attached to the General Hospital, Madras, during the triennium is contrasted below :—

						1899.	1900.	1901.
Classes	...	{	Europeans and Eurasians	411	342	400
			Muhammadans	46	29	39
			Hindus	514	522	620
			Other classes	51	68	124
Total					...	1,022	961	1,183
Sexes	...	{	Men	709	658	750
			Women	254	229	338
			Children	59	74	95
Operations	...	{	Extraction of teeth	734	810	942
			Filling	68	72	70
			Other dental operations	40	146	171

During the year 1901 chloroform was administered for extractions in 14 cases against 7 in the year previous; and in 23 cases against 20, treatment was refused.

16. *Selected operations*.—I wish to bring to the notice of Government the excellent surgical work done by the following officers, especially Lieutenant-Colonels Sturmer and Maitland and Captain Niblock :—

(1) Lieutenant-Colonel A. J. Sturmer, I.M.S.—

Abdominal section	61
Removal of vesical calculi	1
Operations on uterus	60
Obstetric operations	43

(2) Lieutenant-Colonel J. Maitland, I.M.S.—

Amputations	17
Abdominal section	7
Abscess of the liver	14
Operations for hernia	35
Removal of vesical calculi	3
Removal of elephantoid scrotum	22

(3) Lieutenant-Colonel H. A. F. Nailer, I.M.S.—

Excision of joints	1
Amputations	4
Extraction of lens	7
Abdominal section	2
Operations for hernia	5
Removal of vesical calculi	2
Obstetric operations	3

(4) Lieutenant-Colonel T. H. Pope, I.M.S.—

Extraction of lens	621
Iridectomy	106

(5) Lieutenant-Colonel W. F. Thomas, I.M.S.—

Excision of joints	1
Amputations	12
Extraction of lens	1
Iridectomy	1
Abscess of the liver	1
Operations for hernia	1
Obstetric operations	3

(6) Major C. L. Williams, I.M.S.—									
Amputations	3
Extraction of lens	14
Abdominal section	4
Abscess of the liver	4
Obstetric operations	1
(7) Major W. C. Vickers, I.M.S.—									
Amputation	1
Extraction of lens	64
Iridectomy	13
Abdominal section	1
Operations for hernia	9
Removal of vesical calculi	1
Removal of elephantoid scrotum	6
(8) Captain R. H. Elliot, I.M.S.—									
Extraction of lens	697
Iridectomy	133
(9) Captain W. J. Niblock, I.M.S.—									
Excision of joints	7
Amputations	27
Abdominal section	21
Abscess of the liver	4
Operations for hernia	71
Removal of vesical calculi	1
Removal of elephantoid scrotum	28
(10) Mrs. E. W. King, M.D.—									
Amputations	2
Operations on uterus	51
Obstetric operations	109
(11) Civil Assistant Surgeon C. Munusamy Mudaliar, I.M.S.—									
Amputations	10
Extraction of lens	1
Operations for hernia	4
Removal of elephantoid scrotum	1
Obstetric operations	6
(12) Civil Apothecary J. W. Wright—									
Excision of lens	12
Operations for hernia	1
(13) 1st-class Hospital Assistant S. Kottayya Naidu—									
Abdominal section	9
Obstetric operations	5

17. *Training of Medical Students.*—During 1901, 118 students of the college and the apothecary departments attended the General Hospital, Madras, for clinical instruction. Of these 12 were in their fifth, 13 in the fourth, 43 in the third and 50 in the second year of the college curriculum. Thirty-six students at the end of their first year of study also worked at the hospital during the college vacation—April to June. In each of the Government Maternity and Ophthalmic Hospital, 21 students of the college department were afforded clinical training.

18. *Training of Nurses and Midwives.*—On the 1st January 1901 there were 5 nurse probationers in the General Hospital Training school. During the year 16 joined, 3 probationers received certificates and were promoted to the third-grade and 4 left for want of educational qualifications, leaving 14 under instruction at the close of the year. Four special nurse probationers, who pay for their board, joined the school and are still undergoing training. There were 90 applications from women for admission into the school; none for the “Lady Probationers class.” From the Government Maternity Hospital, 6 European and Eurasian and 17 Native nurses received diplomas as midwives, 6 Native nurses belonging to Countess of Dufferin’s Fund and 1 belonging to Local Fund Boards and Municipality also received diplomas.

19. *Finance—Income.*—The chief sources of income during the triennium were—

	1899.				1900.				1901.			
	Amount.		Ratio		Amount.		Ratio		Amount.		Ratio	
	Rs.	A. P.	per cent.		Rs.	A. P.	per cent.		Rs.	A. P.	per cent.	
(1) From Government ...	4,22,307	10	4	25.07	4,01,872	12	3	27.67	4,11,126	13	2	27.22
(2) Local and other funds ...	6,70,523	7	3	41.58	6,60,353	7	0	45.46	6,81,369	11	7	45.10
(3) Municipal funds ..	2,92,717	12	7	19.46	2,65,949	6	3	18.31	2,79,216	6	8	18.48
(4) Interest on investments ...	22,460	5	3	1.50	21,714	6	11	1.49	22,022	13	1	1.46
(5) Sale of securities or withdrawal of deposits ...	1,064	0	0	.07	1,000	0	0	.07	2,591	15	3	.19
(6) Subscriptions ...	38,548	2	7	2.56	46,047	11	7	3.17	55,596	9	10	3.68
(7) Diet by paying patients ...	28,014	10	5	1.86	24,649	4	9	1.70	29,668	13	5	1.96
(8) Miscellaneous sources ..	28,587	7	11	1.90	30,909	13	0	2.13	28,761	15	1	1.91
Total ...	15,04,223	8	4		14,52,496	13	9		15,10,655	2	1	

The contribution by Government in each of the three years in the above excludes the grant of Rs. 20,000 made by the Madras Municipality for the upkeep of the five State hospitals in the Presidency Town.

There was a progressive increase in subscriptions received during the period. In the collection from paying patients for diet, there was an increase during 1901 of Rs. 5,019-8-8 over the preceding year's collections due to the revision of rates of hospital stoppages in the Presidency Town State hospitals.

20. *Expenditure.*—The chief items of expenditure were—

	1899.				1900.				1901.			
	Amount.		Ratio		Amount.		Ratio		Amount.		Ratio	
	Rs.	A. P.	per cent.		Rs.	A. P.	per cent.		Rs.	A. P.	per cent.

GOVERNMENT OF MADRAS.

PUBLIC DEPARTMENT.

READ—the following papers :—

From the Surgeon-General with the Government of Madras, dated 27th June 1902, No.T-1/113.

ABSTRACT. — Submitting annual return (triennial report) of the civil hospitals and dispensaries in the Madras Presidency for the year 1901.

From the Surgeon-General with the Government of Madras, dated 1st July 1902, No. T-1/116.

ORDER—No. 730, Public, dated 1st August 1902.

The Surgeon-General submits the report on civil medical institutions in this Presidency for the triennial period ending the 31st December 1901. In accordance with the suggestions of the Government of India contained in paragraph 12 of Home Department resolution No. 2739, dated 26th March 1901, the report on the medical institutions in the town of Madras has been combined with the general report on civil hospitals and dispensaries in the districts. The report has been prepared with commendable brevity, but in one respect is not in conformity with the instructions of the Government of India. The Home Department resolution above quoted directed that the report should no longer contain a selected list of operations showing the number performed by individual medical officers, but the Surgeon-General has included such a list in paragraph 16 of the present report. He will be requested to omit this list from future reports; there will, however, be no objection to his bringing separately to the notice of Government the work of any officer whom he desires specially to commend.

2. Public health was unsatisfactory during the triennium. There was a marked progressive increase in the reported death-rate of the town of Madras, and a great increase in the reported number of deaths from cholera and fevers both in the districts and in the city. The Surgeon-General attributes the increase under fevers to the declining dread of the plague regulations, which has removed the reluctance previously shown to register deaths as due to fever. The difference between the death-rate of the districts and of the city is very noticeable. Defective registration in the former is admitted.

3. Deaths from plague declined from 1,843 in 1899 to 655 in 1900, and rose again to 3,035 in 1901.

4. The small number of septic cases which occurred in hospitals during the year 1901 is noticed with satisfaction.

5. The Government are glad to observe from the increase in the number of nurse probationers and the large number of applications from women to join the nursing school, that the nursing service of the General Hospital, Madras, appears to be becoming more attractive.

6. There was a satisfactory increase in the amount of subscriptions received towards medical institutions generally and in the collections from paying patients in State hospitals at the Presidency town.

7. There was an increase in the cost per diet of paying patients in the General Hospital, Madras. The variations in the cost of diets in other cases do not call for remark.

8. The Government note with satisfaction that a large amount of inspection work was performed by the Surgeon-General during the past year.

(True Extract.)

G. S. FORBES,
Ag. Chief Secretary.
